

# Download Arboviruses In The Mediterranean Countries

On 14 August 2018, the World Health Organization (WHO) received information from the WHO Regional Office for Europe about a confirmed yellow fever case in French Guiana. On 10 August 2018, the French National Reference Centre for arboviruses (Institut Pasteur de la Guyane) reported an autochthonous

**CLIMATE CHANGE AND PEST DISEASES** The movement of plant pests, animal diseases and invasive alien aquatic organisms across physical and political boundaries threatens food security and creates a global public concern across all countries and Vincent Robert. Vincent Robert is a senior researcher, specialist in medical entomology and parasitology, in the unit MIVEGEC (IRD, CNRS, Univ. Montpellier) at the French National Institute of Research for Sustainable Development (IRD) in Montpellier. Bluetongue disease is a noncontagious, insect-borne, viral disease of ruminants, mainly sheep and less frequently cattle, goats, buffalo, deer, dromedaries, and antelope.
