A weed-eater with a 4-stroke engine might not have the same power, but they are much less hassle. The oil is added to the crankcase. This means that you have to keep an eye on the oil level, but most modern 4-stroke engines have an automatic shutoff switch that will stop the engine when the oil level drops too low. But in addition to these factors, probably the most important thing to consider is the battery. On the market, you will be able to find a wide range of cordless weed eaters, with batteries ranging from 12 volts to about 56 volts.
