

# Download Label Fractions On A Number Line

Place fractions on a number line and rescue animals at the same time in this fun animated math game. The fourth graders I'm working with on a regular basis are learning about fractions. During a class conversation, one student declared, "Fractions aren't numbers." Most of the others in the class agreed. I tried to help with the misunderstanding by teaching a lesson about placing fractions on a number line. Fractions can be a difficult concept to teach. Often we get very focused on fractions as a part of a whole or part of a set, and teach fractions mostly as parts of a pizza, parts of a pie, etc. Fractions are more than parts of a pizza. Learn to graph and locate fractions on a number line.
