

# Download Sequential Analysis Abraham Wald

Abraham Wald single-handedly lay the foundation for optimal solutions to this problem, based on his Sequential Probability Ratio Tests (SPRT). In short, this work is to sequential hypothesis testing what Neyman and Pearson's work is to non-adaptive hypothesis testing. In 1943, while in charge of Columbia University's Statistical Research Group, Abraham Wald devised Sequential Design, an innovative statistical inference system. Abraham Wald (/w??ld/; Hungarian: Wald Ábrahám; (1902-10-31)31 October 1902 – (1950-12-13)13 December 1950) was a Hungarian mathematician who contributed to decision theory, geometry, and econometrics, and founded the field of statistical sequential analysis. He spent his researching years at Columbia University.
