

# Download Signal Transduction And Cardiac Hypertrophy

The signal transduction page provides a detailed discussion of various biological signaling molecules, their receptors, and the pathways of signaling. Heart Failure 2019 - 6th World Congress on Acute Heart Failure 25 - 28 May 2019, Athens - Greece Scientific Programme TRPC is a family of transient receptor potential cation channels in animals. TRPC channels form the subfamily of channels in human most closely related to drosophila TRP channels. Cardiac MHC exists as two isoforms in humans, alpha-cardiac MHC and beta-cardiac MHC. These two isoforms are expressed in different amounts in the human heart.
